**1. Why do we need Cradle to Cradle
when we already have sustainability?**

2. Where does the name “Cradle to Cradle” come from?

3. How is a tree a symbol of Cradle to Cradle and how does that relate to an environmental footprint?

4. What are the three practical principles of Cradle to Cradle?

5. What is the connection between the first principle and product quality?

6. Is recycling Cradle to Cradle?

7. What are examples for current solar income?

What is the difference between renewable energy and C2C Energy?

8. Which types of diversity are there?

9. Under Cradle to Cradle, materials belong to one of two cycles. Which are these cycles? What differentiates them? Examples?

10. What role do the Cradle to Cradle cycles play in the Circular Economy?

11. What does the ABC-X methodology describe in C2C?

12. What does “design for disassembly” mean?

13. What is a defined use scenario?

14. What is a Cradle to Cradle roadmap?

15. What is Cradle to Cradle certification?

15. What is Cradle to Cradle certification?
